THIS AGREEMENT IS SUBJECT TO THE TERMS AND CONDITIONS OF THE MASTER-BROKER AGREEMENT PREVIOUSLY SIGNED

BETWEEN LEONARD'S EXPRESS, INC. AND CIRCLE M LOGISTICS INC.

Food Safety Modernization Act (FSMA)

Minimum Requirements for Handling of Temperature Controlled Food Shipments

Shipper Food Safety Protocol: BROKER shall provide CARRIER with the Shippers' requirements for safe handling of its food shipments. CARRIER shall retain a record of these requirements for one year from the date of delivery. CARRIER acknowledges and understands the shippers requirements and will adhere to said requirements.

Trailer Integrity/Cleanliness: CARRIER must provide clean trailers free of pests, allergens, filth, leaks or strong odors. If a trailer is rejected by the shipper for one of these conditions, CARRIER must clean or repair the trailer to render it in compliance or provide a replacement trailer at its own cost. CARRIER shall have documentation of trailer cleaning and have written procedures regarding the cleaning, sanitation and inspection of trailer condition.

Cargo Compatibility: Finished product with allergens cannot be stacked on top of or under non-allergen products unless a suitable barrier is utilized to prevent cross contamination if products are shipped together in the same trailer. Allergens are antigens which cause a potential life-threatening hypersensitive reaction in an individual and pose a higher risk. Primary allergens, as defined by the U.S. Food and Drug Administration (FDA) include the following:

Milk, Wheat, Peanuts, Tree Nuts, Soy, Shellfish, Eggs, Fish, Sesame

CARRIER must not transport any food shipments on trailers which have previously been used to transport hazardous waste or garbage.

CARRIER shall have no salvage rights to refused shipments if the rejection is due to a food safety violation. CARRIER will be required to properly dispose of all product rejected due to food safety violations in a manner to prevent the item from entering into the commercial supply chain.

Cargo Records: CARRIER must maintain records of shipments loaded onto its trailer so as to be able to verify that it was not used to transport cargos incompatible with food products and which might pose a risk to food cargo.

Trailer Pre-Cooling: CARRIER must pre-cool its trailer to the temperature stipulated in the Shipper's instructions prior to loading the cargo.

Cargo Temperature: CARRIER must not accept any cargo which is not within the Shipper's required temperature range. It is the driver's responsibility to verify the temperature of the cargo prior to loading onto the trailer.

Maintained Temperature: CARRIER must maintain the trailer temperature with the Shipper's requirements at all times from loading of cargo onto its trailer through completion of delivery. Employee and Driver Training: CARRIER must train its employees and drivers on proper food handling in compliance with federal and state food safety laws and must retain records of this training for potential future reference.

Trailer Seals: Driver must verify that a seal has been applied to the trailer and must legibly record the seal number on the bill of lading. If a seal number is already shown on the bill of lading, the driver must verify that it matches the seal number actually placed on the trailer. Trailer seals must be removed only by the consignee or, upon the request of the consignee, by the driver with an authorized representative of the consignee witnessing the removal.
